[Have you been drinking tonight sir?
Could you step out the vehicle please.
These lines are from a popular "Don't
drink and drive" commercial. Like this
commercial, (it) is looking out for safety
of others but it should also be
about the safety of yourself.]

Q) Blc: When drinking ~~the~~ liquor it comes
with great responsibility - you have to
be sure you can handle what you're
given and ~~to~~ be sure that you're with
someone you can trust and that
will help you and try to contain
you. Just like many people, but mainly
young adults they like to go out to
party and drink, but they need to
know what they're into.

STUDENT WITNESSES

TR: Drinking and driving can lead to serious injuries and deaths. Within the past 2 years, the deaths from drinking and driving ~~that~~ from teens are at a 43%. Out of this 43% at least 15 teens will either die or be in I.C.U. for awhile. And not only are they killing themselves but also some young children.

T: Like some other issues with things like this, it has a lot of things encouraging it. Amber Rose did a vodka commercial and talked about how good it made her feel and about how good it tasted. Things like that I believe influence the youth to go out and do crazy things like that. Others like the police department try to warn and give safety tips to those teens and adults that drink when they're out.

To me, drinking and driving is a very
serious issue. In the ~~best~~ world, I feel
that it's nothing ~~but~~ wrong with drinking,
but just know your limits. My only
advice for this issue is Be Smart and
Be Safe.
