Smoking is Bad

I think if you smoke you should stop because it can hurt you or kill you. People should stop ^{smoking} because if you're around kids the smoke gets inside of their lungs that's called a second hand smoke. My cousin she smoke ^{and} her lungs is really mess up. Now she stop she can do stuff she never did before like Bungee jump.

But if you stop smoking you feel better some people smoke because they feel depressed some teens smoke just to fit with others. People some teens just think it cool I call that a copy cat or monkey see monkey do. But people with asthma we know you shouldn't smoke. But people that smoke you almost killing your self.

But I truly think that people should stop smoking because your lungs can turn black but if you don't smoke they will be your normal color and your family won't have to worry about you smoking or you getting sick.
