GOING GREEN! Reduce Reuse Recycle. What's makes a good/excellent environment. Let's help make the World an exciting Place to live in. Did you know 12 million tons of solid waste was generated by the people of New South Wales in 2002-2003 and almost half of it was Recycled.

I believe that if we all pitched in to help make the environment a clean and safe place to live in the carbon dioxide and harmful fumes wouldn't be here. ~~because it helps you breathe better. With out those fumes.~~ Did you know that the black colored <sup>fumes</sup> fumes that comes out the cars, trucks, vans, etc. goes into the air combines the fumes with the clean air and makes it hard for some people to breathe?

We should all pitch in and help Go Green. In 1996-1997 and in 2002-2003 there was an 825% increase of recycling for all types of waste. If we pitch in <sup>there</sup> should be 1000% ~~percentage~~ ~~range~~. What ever happened to Team Work? Being a Team can help the world become a better place.

Recycle, Reduce and Reuse  
16! Did you know 69% of the total waste was generated for recycling in the Australian Capital Territory in 2002-2003 followed by 63% for South Australia and 51% for Victoria! WOW! That amazing!

Let's help make the world go round and help to Reduce, Reuse and Recycling/Recycle. GO GREEN!
